Dear City Council Members,
We would like to address the proposed development on Otis Street. 200 Apartments will create a tremendous strain on the already busy traffic flow on Scott Street and Rogers. Parking already is a concern in our area. We often deal with abandon or long term parked vehicles. How does the city plan to handle the influx of new residents for traffic flow and parking? 178 underground parking spaces will not handle residents of 200 units.

Thank you for your response,

Mike and Bonnie Doherty
