Dear Council Members:

I have signed the letter asking that you support the ordinance banning flavored tobacco products in Missoula, but this is such a serious matter, I want to underscore my opposition to flavored tobacco products with a personal email.

There is no reason any business should be allowed to lure our children into harm's way. Simply because a business is currently supporting itself by victimizing our kids does not mean they should be allowed to continue to do so. Please join concerned citizens in telling them they should not be allowed to profit from compromising the health of our children.

It is the responsibility of all of us to protect our kids and, as our elected representatives, we expect you to do all you can to extend this protection.

Thank you for your attention to this matter and for all you do,
Theresa Cox
