Hello wonderful council members!

I am writing a quick note in support of the proposed JEDI resolution. I think this is an important first step in an essential process toward greater equity that our city should thoughtfully committ to and provide financial resources for. Looking at access to services for our cities vulnerable and underserved residents is incredibly important and something I see disparities in for the population I work with- English Language Learners.

I was awed by the presentations at the last city council meeting and to me, it is incredibly clear that this is necessary and that a rising tide lifts all ships.

Thanks for all you do.

In love and gratitude,

Mary Poole
