Regarding the purchase of decontamination equipment
Please do not appropriate funds for this equipment. It is unnecessary. The same thing can be achieved with hand sanitizer, alcohol wipes and UV wands. As a pharmacist in a sterile compounding facility I am more than well aware of decontamination protocol and material handling. We have none of this expensive equipment and yet our clean room operates in accordance with highest standards of USP and other federal regulations this is confirmed through daily bacterial sampling of the air and surfaces along with other particulate monitoring devices. Spend money like you're on a budget just like the rest of the businesses and families in Missoula that have to choose between gas, food or medication, after all this is tax payer funds. Dont be duped by kart kleen.
