508	PW	2014	2	MRL Trestle at Wyoming/Cregg			WYOMING ST	815,154	815,154	N/A	N/A		Over a hundred years ago there was a south flood channel of the Clark Fork River that passed through what is now the Old Sawmill District and Silver Park. In late 1800s, the Northern Pacific RR built a 350-foot long railroad bridge or trestle over the channel for a line to access the Bitterroot Valley and bring logs to the lumber mill. The channel was later filled in to enable expansion of the mill. For safety in connecting Cregg Ln and extended Wyoming St as well as Silver Park and Civic Stadium a portion of the trestle had to be replaced. The new trestle section was completed using a design and materials that reflect both the historic railroad use and the site's industrial past.

519	PT	2015	2	Silver Park Phases I - IV			WYOMING ST.	3,599,521	3,599,521	N/A	N/A		Silver Park was built in four phases which included construction of: a riverfront trail across the former Champion Lumber Mill Site, a large parking lot to serve the park/river users/civic stadium events, a river access and ramp for non-motorized watercraft, a pedestrian/bike bridge across an irrigation canal to connect the Park to the California St Bridge, and landscaped approximately 14.5 acres of open lawns, groves of trees & shrubs, timber frame pavilion and picnic shelter, restroom facilities, internal trails, and re-formed an dangerous irrigation ditch outflow along the Park's western boundary to a shallow play area. National Timber Framers Guild constructed 3 timber and log open-air shelter structures along the trail. The Park is a model for redevelopment of former lumber product production sites. All soils were created onsite by screening (using Missoula College Heavy Equipment Program) clean overburden and mixing it with material excavated to remove buried methane producing wood waste south of the Civic Stadium. Nearly all materials for structures were reused from buildings formerly on the site and the logs supporting the timber frame structures are 100+-year old "sinker logs" salvaged from the former Bonner Dam on the Blackfoot River. The Park overlies large deposits of wood waste which shifts, so the surfaces of internal trails are a mix compacted decomposed granite and ground psyllium seed hulls which creates an easily repaired hard surface.

A building built as a restaurant then used as a bar casino for several years was demolished and replaced by an retail/office building. TIF was used for demolition/deconstruction.
631	PP	2020	3	Stockman Bank Brooks Street	3601 & 3611		BROOKS ST		454,941			50	This project removed a vacant building that the Police and Fire Depts felt was a public nuisance. It fits in with the Midtown vision for urban infill and residential/mixed use. The TIF reimbursed the cost of public sidewalks, street trees and pedestrian scale lighting will make the area more pedestrian friendly.
632	PP	2020	2	The Row at Milwaukee Trail Residential Project	201	S	CATLIN ST	2,200,000	122,239	3,770	28,500		For many years, this neighborhood was a model of an area envisioned in creating the Montana Urban Renewal Statutes in that there was little in the way of public infrastructure, roads were in bad condition and had many highly packed deteriorating mobile home parks interspersed with manufacturing businesses and auto wrecking yards. Recognizing 20 years of slow change, this project removed a poor quality house converted to duplex and three aging mobile homes to construct eight townhouses along the Milwaukee Trail. All tenants were appropriately relocated. TIF was for deconstruction and site clearing along with new natural gas and power main lines to the property.

641	PP	2021	3	Tremper's Kent Plaza	1200-1210	W	KENT AVE	4,418,000	376,100			25	One of four adjacent buildings was removed (a former laundromat) to create off-street parking and much greater access to the other retail and office buildings. The interior of the two buildings adjacent to the parking area were divided into roughly 1,800 square foot spaces that can be aggregated for larger businesses. Each received new window space and their own outdoor access. A 2nd story was added to the westernmost (1210 W Kent) building for office use and the rest was remodeled to meet codes and standards for retail on the street. Through FIP, the 1980s strip mall exterior façade was removed from all buildings and replaced with a contemporary design. TIF was used for demolition/deconstruction, new sidewalk/curb/gutter and r-o-w landscaping, and paving the adjacent public alley.
642	PP	2021	Front St	Union Block Building Restoration	127	E	MAIN ST	4,579,858	704,858				Since its construction in 1900, the street level of the building has been occupied by retail uses while the second two levels were office uses and the basement used for storage. While upgrading the Main Street entrance used to access upper story offices, the owner found large decorative columns and an apparently intact brick façade under metal backed ceramic siding panels installed in the 1950s or 1960s that cover the entire Main St elevation. Research into the building's original appearance found a remarkable example of late 1800s Victorian architecture. Subsequent studies have found that a majority of the façade materials was preserved enough to allow a historic restoration. Since there is no Facade program in the Front St. URD, MRA followed a direct investment in the facade based on the model used in restoration of Wilma and Merc Pharmacy buildings and required a historic facade preservation easement. Additional funding granted to address unforeseen carved granite and wood areas, etc.

659	PL	2021	All URDs	MRA Communications Plan				56,000	56,000	N/A	N/A	N/A	MRA realized it needed to better explain t the use of Tax Increment Financing to the public. A significant portion of the population does not understand the tool called TIF, how it's used and how the public benefits from those investments. Many projects have been made possible and made better through the investment of TIF dollars. Most citizens may know of the projects and how they benefit from them but have no way of knowing that TIF financing played a significant role in their existence. The Agency needed a Plan to communicate these things to a broad audience.
